PROJECTS

Home Automation System — *Flutter Application*

I developed a cutting-edge home automation mobile application using the Flutter framework, combining my passion for technology and innovation with my skills in software development and hardware integration.

Technologies: Flutter, Internet of Things, Android Studio, MQTT

Mini Game Zone — *Gamez*

Developed a dynamic web application called "Gamez" which is a fun mini game zone during my academic tenure. Utilized HTML, CSS, JavaScript, and Bootstrap to create an interactive platform hosting a variety of mini-games.

Technologies: CSS, Tailwind, Bootstrap, Javascript, NodeJS,

[EXPLORE](#)

Find Blood Donor — *Android Application*

Android application that finds relevant blood donors near you. In this app, anyone can register and start donating blood and plasma to the needy.

Technologies: Android Framework, Java, Android Studio, Google Firebase
